

GRAND LIGHTING™

GL30 XHP70_L25 IP65 LED Gobo Projector

QUICK START GUIDE

BEFORE YOU BEGIN

1. Open the contents of the box and check that the goods have not been damaged during transit.
2. Check that you have received the correct goods including projector and gobo (if ordered as a package).

If you ordered your projector and gobo as a package deal, your gobo should already be installed in the projector ready for use

Any damage, claims, returns or incorrect supply must be lodged within 48 hours of receiving the goods.

CONTENTS

- GL30 XHP70_L25 IP65 LED Gobo Projector
- External Power Supply
- Gobo (if ordered as a package - the gobo will already be fitted inside the unit)

Scan to download the full manual

FOCUSING YOUR LIGHT

- 1 Plug into power.

The gobo will already be fitted inside the unit.

- 2 Spin the front lens in or out until your image is in focus.

- 3 Once you are happy with how the image is focused, tighten the locking ring.

This ensures the fixture remains water tight.

CHANGING YOUR GOBO

- 1** Always disconnect your fixture from power before changing the gobo.

- 2** Undo the 4 thumb screws on the front facia, and remove the front plate.

Be careful not to lose the black rubber seals and the metal washers.

Thumb screws

- 3** The gobo is seated within a holder, and held in with a circlip.

Gently pinch the spring circlip to remove it. Take care as it can flick out suddenly.

You can now carefully remove the gobo.

Spring circlip

CHANGING YOUR GOBO CONT.

- 4 Load the new gobo into the holder.

If it is a glass gobo the reflective side MUST face the lamp as per diagram below.

- 5 Re-insert the circlip ensuring you push it all the way down so the gobo sits flat

- 6 Replace the front plate, rubber washers, metal washers and finally the thumbscrews.

Do them up firm, but don't overtighten them.
