

GRAND LIGHTING™

GL200FL HiDef 7deg Fanless LED Gobo Projector

You will need two 17mm spanners to fit and tighten the nuts that you will find in the container.

Check your gobo has already been fitted in here.

Note this seal, tighten the lenstube firmly against this silicone seal.

There is a second silicone seal here. Once you have focused the light please tighten this locking ring onto the silicone seal.

This is the lens you rotate to focus, then tighten locking ring.
